

## QA. Python, Sem1, Assignment 3

1. Open a Chrome browser.
2. Navigate to “http://www.fb.com”
3. Verify that the page is redirected to “http://www.facebook.com”, by getting the current URL. (use if-else condition to verify this condition or use Assert.assertEquals() in case you are familiar with TestNG or JUnit)
4. Verify that there is a “Create an account” section on the page.
5. Fill in the text boxes: First Name, Surname, Mobile Number or email address, “Re-enter mobile number”, new password.
6. Update the date of birth in the drop-down.
7. Select gender.
8. Click on “Create an account”.
9. Verify that the account is created successfully.

# Create an account

It's free and always will be.

Birthday

[Why do I need to provide my date of birth?](#)

☐ Female ☐ Male

By clicking Create an account, you agree to our [Terms](#) and that you have read our [Data Policy](#), including our [Cookie Use](#).
